To whom it concerns,I pay for my satalite radio service. For this payment I receive a superior service for music, talk, and information. The weather and traffic reports I receive are far more accurate, timely, and useful than I can get from am or fm stations. Realizing that The National Association of Broadcasters is a powerful lobby whose interests are those soley of am and fm broadcastrers(monopolies for financial gain of a few), I hope you will be objective in allowing the American free enterprise system to work, by allowing satalite radio, the fought for freedom of providing these services. Americans are willing to pay for this improved comercial free service and deserve the right to do so. I am tired of special interest groups receiving preferential treatment through the investement of lobbies. Let our free enterprise system work as it was meant to.

Thank you for the chance to express my feelings.
